HOW ARE NET PROFITS ALLOCATED?

The business allocation percentage formula is to be used by unincorporated businesses, partnerships, professions, corporations, and other entities doing business within and outside of the City of Canal Fulton if actual records of their business are not maintained.

The business allocation percentage shall be determined by the ratio of the Canal Fulton portion of:

- (1) Average value of real and tangible property owned, rented or leased by the taxpayer for use in the trade or business.

To determine the value of rented or leased property used in business, multiply the gross annual rental by 8.

- (2) Gross receipts from sales made and services performed, regardless of where made or performed.
- (3) Total payroll.

Add the ratios obtained and divide the total by the number of ratios used to obtain the business allocation percentage. A ratio shall not be excluded from the computation because it is allocable entirely within or entirely outside the City of Canal Fulton. The business allocation percentage is to be applied against the total net profits adjusted in accordance with the provisions of the Ordinance to determine the portion taxable under the Canal Fulton Income Tax Ordinance (Schedule Y Business Allocation Formula).
